

July 30, 2019

Ryan DeLury C.E.T.
Chair
Association of Chief Boiler and Pressure Vessel Inspectors (ACI)

Dear Mr. DeLury,

On June 25, 2019, NPSAC met in Halifax, NS. During that meeting, PTAC made a presentation and sought NPSAC's input on three aspects of CRN harmonization. Those three areas are as follows:

1. Technical recommendations on the sharing of information related to CRNs between provinces and territories;
2. Development of a uniform application form for design reviews;
3. Examination of whether fees charged for design reviews should be aligned across jurisdictions.

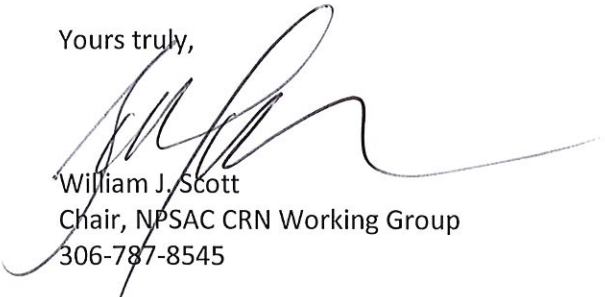

In response to that request, NPSAC created a working group, of which I am the Chair.

I am writing you to invite ACI to assist in this task.

PTAC has asked that we finish our work by October 1, 2019. In that regard, the NPSAC group is presently addressing these questions and aiming to have a working paper for discussion by the end of August.

Please call me directly to discuss, or should you have any questions or concerns.

Yours truly,

William J. Scott
Chair, NPSAC CRN Working Group
