

**ACI Meeting
Teleconference
2020-08-24**

Updates prepared by Djordje Srnica

CSA Z662 liaison report

CSA Z662 TC had two meetings in the last 12 months (Nov. 2019 and June 2020).

For 2023 edition, the focus will be on:

- Rewrite of Annex B (Risk Assessment)
- Review of Management system requirements (harmonization)
- Investigation if strain-based design (SBD) SBD can be used for design and assessment for displacement-controlled load conditions (ground movement, thermal expansion, permafrost, etc.)
- Addressing HAZ softening issues in girth welds (high strength materials)
